The certified copies not received. In the certified copies not received.

'Art Unit: 3683

- 1. Receipt is acknowledged of the amendment filed on 3-25-2002.
- 2. It is noted that Applicant has used the incorrect title "Sintered Steel Material" on the amendment and numerous IDS statements. Future correspondences should include the correct title of the invention to avoid confusion.
- 3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the hydraulic piston and cylinder mechanism must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

4. Claims 1-5, 7, 8, 10, 11 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 5 are each indefinite in the open-ended ambiguous term "or the like". Claims 1 and 5 are also each indefinite in the narrative recitation "said servo motor being less than the corresponding...". Claims 2-4, 7, 8, 10, 11 and 13 are each indefinite due to their dependency on claims 1 and 5. In addition, claim 13 is a duplicate of claim 8.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 3683

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 2, 4, 5, 6, 8, 11 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by either Carre et al or Ralea.

Both Carre et al. and Ralea show electrically applied multi-disc brakes.

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 3, 7, 10 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carre et al in view of UK Publication 2,306,528 by Steiner et al.

The claimed invention differs from Carre et al. only in the use of a hydraulic cylinder and piston. Steiner et al. show a motor that operates a hydraulic piston and cylinder to operate the brakes.

It would have been obvious to one of ordinary skill in the art to utilize a hydraulic piston and cylinder with Carre et al. as a replacement for the wedding unit dependent on the type of vehicle so as to provide for anti-clock or anti-slip braking.

9. Any inquiry concerning this communication should be directed to Mathew Graham at telephone number (703) 308-1113.
